PROFILE

An experienced WordPress/WooCommerce and PrestaShop Full Stack Developer with excellent skills. Experienced in upgrading both front-end and backend platforms running on WordPress/WooCommerce and PrestaShop. Able to work with senior technical leadership to build effective eCommerce solutions. Proficient in contemporary web technologies such as PHP, Laravel, Node.js, React, Vue.js, and Angular.js. Strong ability of problem solving coupled with a dedication of delivering high quality scalable applications.

WORK EXPERIENCE

WordPress Developer   2022-2024

Amidevs Digital Solutions

- Collaboration: Collaborate with a customer's CTO as well as their Senior Database Architect to upgrade and maintain WordPress/WooCommerce platforms.

- Platform Development: Further develop six eCommerce sites built on PrestaShop, implementing custom integrations and plugin development.

- Next-Generation Site: Come up with a next-gen, all-in-one eCommerce website, ensuring scalability and performance.

- Maintenance and Support: Always provide continuous platform maintenance together with support by fixing bugs promptly.

- Backend Development: Use PHP (v7 & v8) with the Laravel framework, Node.js, and PostgreSQL for backend development.

L A N G U A G E S

English

Swahili

- Frontend Development: Develop responsive and user-friendly interfaces using React, Vue, Angular, Bootstrap, HTML, JavaScript, and CSS.

- APIs and Microservices: Develop and consume REST APIs plus microservices that enhance the platform's functionality.

- Development Tools: For effective development and version control, use Git, Visual Studio Code, Postman, and DDEV.

React Developer   2021-2022
Webtech Solutions

- Developing and customizing WordPress/WooCommerce sites including the integration of external plugins and APIs.

- Backend and database administration: writing complex queries, stored procedures using PHP, MySQL/MariaDB, PostgreSQL

- Building web interfaces: HTML, JavaScript, CSS or any other frontend frameworks like ReactJS or VueJS for creating interactive web pages

- App Security: Kept applications secured and authenticated in line with standard practices by performing periodic tests.

- Containerization: Docker was employed as a tool to implement containerization that made it easier to develop,test,and deploy.
